TO BE USED IN THE

SUBJECT-CATALOGUE

LIBRARY OF THE SURGEON-GENERAL'S OFFICE.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1878.

REMARKS.

The list of Abbreviations of Titles of Periodicals, herewith published, comprises those which it is proposed to use in the Subject Catalogue of the Library of the Surgeon-General's Office.

A few copies are printed at the present time, in part to obtain criticisms and suggestions, in part as a matter of convenience in the preparation of the manuscript of the Catalogue for the printer.

It also indicates the amount of work which has been done, up to the present time, in cataloguing original articles in medical periodical publications; and as this has been completed for all Journals and Transactions in the Library which have been found worth indexing, excepting those devoted exclusively to Chemistry, Pharmacy, Veterinary Medicine and Dentistry, it affords a fair exhibit of the resources of the Library in this class of literature.

The abbreviations are prepared as far as possible in accordance with the following principles:

- 1. To follow the exact order of the words of the title.
- 2. To make them as brief as is consistent with clearness to those who are familiar with medical literature.
- 3. To follow strictly the orthographical usages of each language. This disposes of the question of capitalization.
 - 4. To attain uniformity.

Some exceptions to this last rule have been found expedient. An abbreviation which is quite intelligible in the body of a title is not always suitable as the first word, and the context may make an abbreviation sufficiently clear in a long title which in a short one would appear obscure. The convenience of the reader is regarded as of more importance than a rigid adherence to uniformity. The following minor details, with the list of single-letter abbreviations, will assist in the comprehension of the scheme:

The article with which a title commences is invariably omitted.

Prepositions and articles are omitted in English titles, but in other languages their entire elision would lead to obscurity, and is not warranted by usage.

The place of publication is not added when it forms an integral part of the title; in such cases it is given without abbreviation, except in instances of constant recurrence, as London, Paris, Berlin, etc., which are condensed into Lond., Par., Berl., etc., on all occasions.

The reader seeking explanation of an abbreviated title will find it under its first word (article excluded) in its alphabetical place in the list, but cross-references have been added when, as in the case of Societies, the first word of the title may not be sufficiently distinctive.

One exception has been made to the rule of strict adherence to the order of the title: La Lancette française, gazette des hôpitaux civils et militaires, is everywhere known as the Gazette des hôpitaux, and is abbreviated under the latter title.

Some of the abbreviations of names of places, especially in the United States, might have been still further shortened if the Catalogue had been intended for use only in this country. But an analysis, by subjects, of the largest collection of medical periodicals in existence, is, necessarily, useful in St. Petersburg, for example, as well as in Washington, its measure of utility in any locality being the extent of the collection of medical periodical literature therein. Intelligibility to foreigners, therefore, has been regarded as a quality essential to the abbreviations in question.

SINGLE-LETTER ABBREVIATIONS.

- v. van, von, voor, vor.
- z. zur.

In the column containing the full titles of periodicals will be found bibliographical details of which corrections, where needed, are solicited. It affords an opportunity, also, of making known the deficiencies of the Library in this department at the present time.

I am indebted to Dr. Robert Fletcher for much valuable assistance in the preparation of this list, and in supervising its passage through the press.

JOHN S. BILLINGS.
